

# EvaPack™ Hygienic Pad

## Which color would you choose?

EvaPack™ Pad

Ceramic Pads

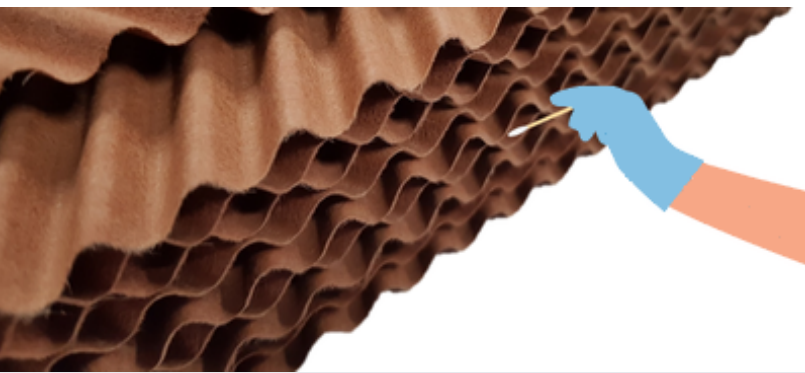

EvaPack™ Pad

Designed for **hygienic** evaporation

Corrugated fiberglass **fully and easily cleanable.**

**Cleaning inspection** and validation is possible anywhere on the contact surface.

Compatible with **all types of water** : drinking, softened, osmosis and ultrapure water.

**Officially** ISO 846-certified, for microbiological inertness.

Officially VDI 6022 certified, **the unique hygienic certification** in HVAC.

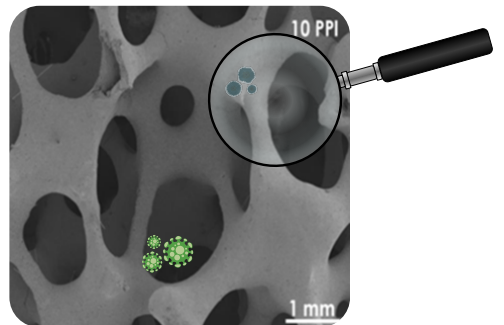

Ceramic Pads

Originally designed for particle filtration

Ceramic foam, difficult even impossible, to clean.

Cleaning inspection and validation impossible because of foam structure.

Not compatible with drinking water or ultrapure water.

Not certified by an official ISO entity.

Incompatible with VDI 6022 standard, as hygienic inspection is not possible.

**HYGIENIC BEYOND CLEAN**

**Armstrong transparency is the new white**
